

YATES PETROLEUM CORPORATION

**2013 Reclamation Projects
Completed**

YATES PETROLEUM CORPORATION

Highway Federal #7 & Highway Federal 4Y/4Z locations –

Much of the rabbitbrush was mowed with a bushhog and the interim reclamation area was over seeded using a range drill with a seed mix which included grasses and forbs. Sagebrush seed was broadcast on the snow in January 2014.

YATES PETROLEUM CORPORATION

Highway Federal #5/27 well pad - Several areas with erosion issues were addressed and the Rabbitbrush was mowed and the interim reclamation area was over seeded using a range drill with a seed mix which included grasses and forbs. Sage Brush seed was broadcast on the snow in January 2014.

YATES PETROLEUM CORPORATION

Highway Federal #11 SWD – Interim reclamation areas that were not fenced were over seeded using a drill with a seed mix which included grasses and forbs and all the disturbed areas not being used were fenced. Sage Brush seed was broadcast on the snow in January 2014.

YATES PETROLEUM CORPORATION

Highway Federal #2 final reclamation areas –
Sagebrush seed was broadcast on the snow along
the access road and location in January 2014.

YATES PETROLEUM CORPORATION

Southeast Pinedale Federal #1 – During the summer of 2013 cheatgrass was found to be growing on the interim reclaimed areas of the location and it was sprayed immediately to control the infestation. The well bore was Plugged and Abandoned and all production equipment was removed in the fall of 2013.

YATES PETROLEUM CORPORATION

All of YPC's locations on the Anticline were included in our annual weed control program

YATES PETROLEUM CORPORATION

**2014 Reclamation Projects to be
Completed**

YATES PETROLEUM CORPORATION

Southeast Pinedale Federal #1

As soon as weather permits the location and access road will be reclaimed, seeded and the location fenced.

YATES PETROLEUM CORPORATION

All locations will be inspected as part of our annual weed control program and monitored for areas of cheatgrass growth and sprayed/controlled as needed.
